

Sr. Transportation Engineer

Portland, OR

Murray, Smith & Associates, Inc. (MSA) is currently seeking a Senior Engineer - Project Manager (Transportation) to be located in Portland, Oregon (relocation assistance provided, if needed).

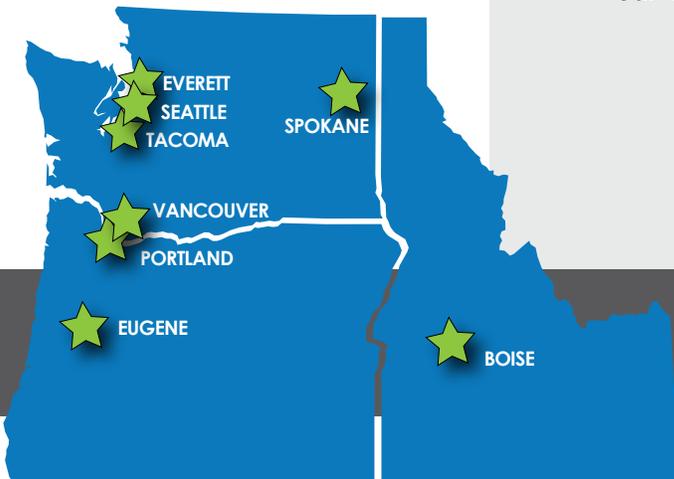

If you are looking for an opportunity to develop a rewarding and stable career with an established firm that values its employees and provides opportunities for growth and advancement, this may be the place for you.

Who is Murray, Smith & Associates, Inc.?

MSA is an employee-owned Pacific Northwest civil engineering firm with an excellent reputation and consistent growth trajectory gained from over 36 years of successful business.

With a team of 110 across eight offices in Oregon, Washington, and Idaho, we provide 99 percent of our services to public agency clients in the fields of transportation, stormwater, water, wastewater, and other specialty areas. We enjoy a stable, yet varied backlog of small to large projects in a friendly work environment that encourages collaboration across offices.

At MSA, you'll find that we are just the right size - large enough to employ diverse talent to solve our clients' biggest challenges, yet small enough to genuinely care and adapt to our clients' needs.

MSA

The transportation group at MSA continues to be our company's most significant growth area, starting with a few key individuals at the turn of the millennium to a highly capable team now comprised of over 20 people with our core services in the Oregon market. This organic growth has fostered a motivated and energetic team that takes pride and ownership of their expanding workload.

Team members enjoy providing a wide range of design and construction management services ranging from smaller scale city engineering and local agency assignments to multi-million dollar federally funded freeway projects for state agencies.

As a key member of this growing team, you will help lead and guide our talented mid- to junior-level staff as we collaborate to deliver high-quality projects. This is also an opportunity to develop new relationships to expand our client base and to strengthen established relationships through commitment to quality and long-term client service.

A core element of MSA's strategic growth plan is to round out our transportation team in our current Oregon market, and then focus on growing these services region-wide in Washington and Idaho. If that challenge excites you, we are looking for the right motivated, career-minded and experienced individual in our Portland office to help us better reach currently underserved or not-yet served clients within our service area. To make this happen, we need someone who will integrate with our group and build relationships with our clients, effectively providing growth opportunity to the individual and building our capacity to do more as a firm.

Our ideal candidate is collaborative, excited to be part of a team, adaptable in a growing environment, and inspired to invest in the long-term benefit of both our team and our clients. In doing so, there is great opportunity to expand our service capability in terms of project size, complexity, number of clients and geography beyond Oregon. We take pride in building our business the right way through genuine and authentic relationships with our team and agency clients to establish a level of trust we feel is essential for long-term growth.
