

# NORCAL WITH CENTRAL CA ITE JOINT SECTION MEETING

Wednesday, April 21<sup>st</sup>

Time: **11:30 AM**

Location: **Zoom Meeting**

Cost: **FREE for ITE Members & Students**

**\$5 for General Admission**

## Presentation

### **Drone Usage in Traffic Data Collection**

National Data & Surveying Services will give an overview of the process and various collection types where drone usage is appropriate and beneficial. Recent projects that benefited from drone usage will be highlighted, as well as an overview of the pros and cons of using drone technology. The presentation will also share some unexpected use cases of drone technology that were discovered.

## Presenters

### **Kevin Deal – Chief Operations Officer, NDS**

Kevin has amassed a great deal of experience in every aspect of the data collection industry. His expertise includes field operations, administrative operations, program development, R & D and companywide quality control. He has successfully managed over 35,000 projects from inception to completion which have at times included customized study development as well as customized deliverables.

### **Steve Sandbank – Area Manager, NDS**

Steve is a Northern California native growing up in the Sacramento region and graduating from CSU Sacramento with his BA. Professionally working between the Bay Area and Sacramento area; Steve has developed and managed multiple industries for over 20 years in Field Services; installation, maintenance and repair, technical service and delivery. Six-sigma certified with significant experience developing service teams. Steve is entering his 4th year with NDS where he has successfully managed thousands of projects to this point.
